ALL-COLLEGE READING LIST

1985-86

—LINDENWOOD COLLEGE—

This year brings something NEW to the Lindenwood Community: our first All-College Reading List. Every year, we will select a number of books on diverse subjects which all members of the college -- you, too! -- should read, enjoy and discuss. Here are the titles chosen for the 1985-86 reading list:

- Jerome Rothenberg, ed. *Technicians of the Sacred: A Range of Poetries from Africa, America, Asia, Europe and Oceania*. 1985.
An anthology of ancient poetry from around the world, together with analogous writings from contemporary poets. Rothenberg's commentaries on the ancient poems suggest their relevance to modern times.
- E.F. Schumaker. *Small is Beautiful*. 1976.
A critique of major premises and values of the current market economic system. As one solution, Schumaker proposes cheap, universally accessible technology and a change in human values, with people rather than technology as the focus.
- Lewis Thomas. *The Lives of a Cell: Notes of a Biology Watcher*. 1974.
A series of 29 brief essays covering a variety of topics that include innate behavior in man, the structure of societies, the effects of man's activities on the environment, computers, medical technology and the possibility of extraterrestrial life.

We hope that the interest and diversity of these books will quicken our academic metabolism. Lectures and discussions, as well as usage of the books in courses, should help make our private experience part of a shared understanding.

The Lindenwood Bookstore has copies of all books on the list. In Butler Library, copies of each book are on three-day reserve.

Although the reading and related discussions are not a college requirement, we should all recognize that this activity is an essential part of our common effort to be educated human beings.

In the fall, you will be asked to evaluate this year's list and to make recommendations for next year's All-College Reading List.
