Sponsored by the Lectures and Concerts Committee, the event is open to all members of the Lindenwood community.

Dr. Bolanos, who received his medical degree from St. Louis University in 1952, practiced in Nicaragua until 1972 when his practice was disrupted by an earthquake. Six years later, he left Nicaragua after his hometown of Masaya was burned and looted by Sandinistas forces, a year before they took power. Reports from friends and relatives since then have caused him to become politically involved. He has researched the Sandinistas extensively, and is working to inform Americans of his critical findings.

For the past 14 years, he has done research on William Walker, an enigmatic American who became president of Nicaragua in the mid-19th century. This research has led him to be labeled as one of the foremost authorities on mid-19th century Nicaragua. Dr. Bolanos is responsible for the research, translation and publication of a number of volumes and historical documents on Nicaragua. Plan now to attend this informative presentation tonight!
