About the Journal

We are very proud to present the second issue of the Research Methods Journal. This semester, the students designed, implemented, and presented their original research project. In addition, they used their creativity and imagination to propose a second project that is unrelated to their first research study. All of the students took an active role in the review process of the individual papers, providing helpful and often insightful comments to the author. The quality of the papers in this issue of the journal is a testament to the hard work and pride that the students have put into their course.

This year, several talented students came up with very creative covers for the journal and the choice was extremely difficult. In the end, the first place design by Jennifer Sytsma was chosen by the class to appear as the front cover of our journal. The class chose Sarah Brady's design which came in second place to appear as the title page for the research proposals that are found toward the back of this issue.

The course tutor, Stephanie Burkhardt took on the challenging task of Editor for this journal. We are very grateful for Stephanie's hard work throughout the semester and her dedication to the class. We would also like to thank Katy Black, Jaclyn Nessler, and Sarah Torpea for helping to proofread this publication.
