Lindenwood University Art History Professor Dr. James Hutson was recognized as one of the Top 5 Remarkable Men in Education for 2023 by the Knowledge Review magazine in December.

The Knowledge Review is an international education magazine for universities, students, teachers, and parents and includes news, blogs, articles, and courses from the best universities, according to its website. Additionally, it aims to connect people passionate about education and innovation.

Hutson's unwavering pursuit of innovation also highlights Lindenwood's value of "we have grit." Through his role at Lindenwood, Hutson provides his students with knowledge and insight. As one of the Top 5 Remarkable Men in Education, Lindenwood students can learn from one of the nation's top professors in his field of expertise.

Hutson was recognized for his significant contributions to education and approach to education, especially in integrating artificial intelligence (AI). Additionally, this recognition highlights Hutson's relentless pursuit of extending the boundaries of education by meshing newer technologies, such as Extended Reality (XR), and his commitment to making education more engaging and inclusive.

"This recognition is not just mine but is a testament to the visionary leadership and unwavering support of the College of Arts and Humanities at Lindenwood University," Hutson said. "Together, we've created a dynamic environment where innovation in education is not just encouraged but expected. I am profoundly grateful to each administrator, faculty member, and student who has journeyed with me in this endeavor.

"Revolutionizing education in the Digital Age is a colossal task that requires the collective wisdom and effort of many. I am deeply thankful to my extensive network of researchers, both within and outside our institution, for their collaborative spirit and shared commitment to advancing the frontiers of education. Our collective efforts in integrating emergent technologies like XR and AI (artificial intelligence) are paving the way for a new era of immersive and inclusive learning experiences."

"Being recognized as one of the remarkable educators of 2023 is both humbling and exhilarating," Hudson said. "It reaffirms my dedication to exploring uncharted territories in education and fuels my desire to continue this journey of discovery and innovation. Let us all continue to push the boundaries of what is possible in education and, in doing so, inspire the next generation of learners and leaders."
